

[Golf-N-Go Caddy]

Abstract

A cost effective and convenient way for the frequent golfer to have a motorized golf scooter/cart with the individual at all times. A lightweight golf scooter/cart that is affordable and easily transportable without additional towing accessories. The Golf-N-Go Caddy can easily be compacted (fold), can easily be lifted in and out of a vehicle's trunk, and can easily be set up. Simply place the golf bag and clubs within the golf bracket and the golf scooter/cart is conveniently ready to go. When the Golf-N-Go Caddy is not in use on the golf course, the weight of the clubs will conveniently keep the scooter/cart upright on the golf stand, allowing easy access to the clubs.
